Dimensions	1050mm x Ø114mm (800mm above ground, 250mm below ground concrete in)
Weight	6.2kg

TECHNICAL SPECIFICATIONS

Ingress Protection	IP65

Impact Flex Rubber Reboundable Bollard – Flexible Security Post (800mm Above Ground, Ø114mm)

The next generation of impact-resistant bollards. Built to flex, built to last.

Upgrade your site protection with our **Impact Flex Rubber Bollard**, designed to absorb vehicle impacts without permanent damage. Manufactured from high-performance **polyurethane**, this **flexible bollard** bends on impact (up to 180°) and returns instantly to its original position — reducing maintenance, downtime, and replacement costs.

Unlike traditional steel bollards, this **self-righting bollard** requires **no painting, no reinforcement, and no ongoing maintenance**.

Key Benefits

✔ **Flexible impact design** – bends under vehicle impact, then fully recovers
✔ **Virtually unbreakable** – reduces replacement and repair costs
✔ **No painting required** – colour runs through the material
✔ **Rigid in normal use** – strong and stable when upright
✔ **High visibility** – 2 x reflective bands for safety compliance
✔ **Maintenance-free solution** – ideal for high-traffic areas
